Find it easy!

Lost keys? Misplaced remote control? Missing iPod? Never lose anything again with the EZ-Find!, a small gadget that keeps track of important items. The sleek, patented-designed locator system includes a hand-held device that utilizes radio frequency technology to locate lost items that are tagged with EZ-Find! tags that beep. The device can track up to 25 items at once and the wireless remote sends signals more than 60 feet indoors (through floors, walls and cushions) and 100 feet outdoors. Attach a receiver tag to the item, synchronize the tag with a personalized description on the EZ Find! display and you're ready to go. The EZ-Find!, which sells for \$59.95, comes with a hand-held device and four long-life battery tags that emit a loud 92 decibel alarm. Additional two-tag packs sell for \$14.95. For more information or to purchase the EZ-Find!, visit www.ez-find.com
