Every household needs

HOW EZ IS THIS?

Anyone who has wasted valuable time searching for lost keys will appreciate the beauty of the EZ-Find!™ system that lets you track up to 25 different items.

EZ-Find!™ is a patented locator system that features a hand-held device utilizing RF (radio frequency) technology to locate lost items tagged with small, EZ-Find!™ tags that beep. The EZ finder's display and scroll features allow you to synchronize the tag with either personalized descriptions such as "remote" or with a tag number on the display. Then simply scroll the display screen to find your missing item and press FIND. It's that EZ!

EZ-Find!™ is like no other product on the market. It's sleek, high tech and affordable. Because it's expandable, it's continued usefulness is assured for years to come. As part of the fast-growing product category of electronic locators, the demand for EZ-Find!™ is expected to rise with the increase of aging baby boomers, busy households and products getting smaller and harder to find.

Wireless remote sends signals over 60 feet indoors and 100 feet outdoors through floors, walls even cushions

EZ-Find!™ Tag Items

- Keys
- Remotes
- Toys
- PDA's
- Phones
- Cameras
- Game Boys®
- Ipods®
